Introduction

In December, 1974, the first EPA Book Catalog was published, representing the holdings of the 28 libraries comprising the Library System of the U. S. Environmental Protection Agency. Included is the monograph collection of each location from the inception of EPA (December, 1970) through July, 1973.

In August, 1973, a centralized cataloging system was established at the EPA library in Cincinnati, Ohio. All libraries submit their new acquisitions to Cincinnati and a monthly report is issued. The second EPA Book Catalog constitutes a cumulation of those reports, covering the period August, 1973 to December, 1974. The present volume covers the period January to December 1975 and includes 4,705 unique titles and 12,079 associated records, of which 6,873 represent holdings.

Please note that the catalog reflects the holdings of each library at the time of submission. In the interim, the collections may have been purged. A listing here does not necessarily mean that the title will be available forever at any given location.

Every effort has been made to avoid the use of abbreviations in titles, substituting complete words instead. For example, "U.S." has been expanded to read "United States."

The entire catalog and its indexes (Author and Subject) are available on COM (42x), as well as in hard copy and regular 24x microfiche from the National Technical Information Service (NTIS) in Springfield, Virginia.

Thanks are due to the staff of each library in the EPA Library System for their complete cooperation. In Cincinnati, Mary Lee Burbage was responsible for cataloging and bibliographic citation verification. Roberta Noonan performed computer input and edited, corrected, and maintained control of the master files during processing. Clerical assistance was provided by Dianna Irwin and Nancy Ryan.

Sarah Thomas Kadec
Chief, Library Systems Branch

How to Use the Book Catalog

The U. S. Environmental Protection Agency Library System Book Catalog of holdings from January to December 1975, has been published in a single volume. The full catalog lists alphabetically by title (initial articles omitted) the complete entry for each book owned by the individual EPA libraries. The title is printed in bold face type. Directly underneath, left justified, appears the call number (according to the Library of Congress Classification Scheme). At the far right of the same line is the publisher. The next line, in italics, reflects the author(s) and may be followed by an entry showing symposium data, subtitle, series, or other notes (not applicable to each title). The subject headings assigned to the book appear next, indented, one per line. The next line, indented still further, lists the code number for the holding library, pertinent volumes and/or editions, the date(s) of publication and, where appropriate, a call number used by the holding library which differs from the Library of Congress classification.

The indexes to the Book Catalog are in two parts. Part 1, the Author Index, lists each author in alphabetical order. Indented beneath each name, alphabetically, appear the titles of the works of each author, followed by the call number for each title, in italics.

The Subject Index (Part 2) lists, in alphabetical order, the subject headings assigned to the books in the catalog. Indented beneath each one appear, alphabetically, the titles associated with it, followed by the call number, in italics, for each title.

The complete entry for items listed in the Author or Subject Index may be obtained by consulting the full catalog, where the appropriate title will be listed alphabetically. The holding libraries may be identified by referring to the List of EPA Libraries, beginning on page ix.

Each library has an additional part of the Book Catalog, published separately, which lists its own holdings in call number order (per the Library of Congress Classification Scheme). This list is used for inventory purposes and may be consulted as necessary by any user.
